CGDA

The Defence Accounts Department has just commemorated its 267 years of existence which coincides with 67 years of our national independence. This fact underlines the rich and evolved legacy of our department. With the changing requirements of the service we have moulded and added new dimensions to the quality of our services.

Last year, I had laid emphasis on key areas for increasing efficiency and transparency in our three core areas of audit, payment and accounting. In line with that, we have taken steps to improve the services for our clientele. It has also been our continuous focus to revamp our grievance redressal mechanisms.

Project 'Sangam' is an applaudable milestone in this direction. It was a mammoth task and required a lot of will power and effort to get the required data from bank, treasuries and post-offices. The department has been successful in issuing a total of 16 Lakh 70 thousand corrigendum PPOs for Pre-2006 retirees through Project "Sangam". By creating a digital data base in regard of all Pre-2006 retirees for whom have Corrigendum PPOs been issued, we have ensured revision of pension at a faster pace in accordance with future pay commission reports or other government orders. Further, with the implementation of the Pension Account System, we are in a position to do more effective monitoring of the Pension Budget.

The Pay and Accounts services have been significantly enhanced through inhouse efforts through the following IT based systems:-

- a) Prompt and Accurate maintenance of GPF Accounts of Defence Civilians
- b) Developing of an in house office automation system to bring transparency in third party payments.
- c) Conversion of compilation system from the present online to real time system.

Improving the quality and quantum of Internal Audit Reports has been the focus of the department in the last year. In this direction risk-based analysis of audit findings and updation of office manuals have been undertaken. In the last year a total of 200 IARs approximately valuing ₹ 2250 crores approximately have been reported.

The last year has been a very eventful year, full of activities oriented to achieve the desired targets. I place my appreciation on record for the persistent efforts put in by the officers and staff of the department in achieving the targets.

I wish you all success in your future endeavours.

(Vandana Srivastava)

DAD DAY CELEBRATIONS: A WORD PORTRAIT

The 267th Defence Accounts Department Day was celebrated with exuberance on 1st October, 2014. Celebrations at the Office of the CGDA commenced with the traditional lighting of the lamp by the Chief Guest Admiral R K Dhowan, PVSM, AVSM, YSM, ADC, Chief of Naval Staff and Guest of Honour Shri Avinash Chander, SA to RM. Lt. General Philip Champose, AVSM, VSM, Vice Chief of Army Staff, Air Marshal R K Sharma, PVSM, AVSM, VM, ADC, Vice Chief of Air Staff, Vice Admiral Sunil Lanba, AVSM, Vice Chief of Naval Staff, Lt. General A T Paranaik, SM, VSM, DGBR, Air Marshal D P Joshi, PVSM, AVSM, PHS, DGAFMS, Shri Ravi Kant Chopra, DGDE, Shri Jawahar Thakur, CGA and Shri Arunava Dutt, FA (DS) along with senior serving and retired officers too graced the occasion.

CGDA welcomed and thanked the august gathering and lauded the efforts of DAD personnel for release of over 16 lakh Corrigendum PPOs.

On this occasion an in-house developed “Defence Pensioners’ Information Portal” was launched by the Scientific Adviser to Raksha Mantri Dr. Avinash Chander.

The “Defence Pensioners’ Information Portal” has been designed to provide pension related information to the twenty lakh pensioners paid by various Banks.

This was followed by a message from Hon’ble Raksha Mantri Shri Arun Jaitley. The Chief Guest presented the “Raksha Mantri Awards for Excellence” to DAD employees selected for their outstanding contributions during 2013-2014.

The team of PCDA (Pensions), Allahabad headed by Shri S. Murali Krishnan from the office of CGDA and Shri C.B Yadav, from PCDA (Pensions) was conferred the award for e-initiatives in the area of Pension Sanction and e-scrolls based pension accounting.

The team of CDA Chennai headed by Shri V. Sampath, was conferred the award for the development of a new web based and more robust office automation software ‘SUGAM’.

The team of CGDA Office and CDA (Funds) Meerut led by Shri Rajbir Singh, SAO, was awarded for IT initiatives in streamlining the maintenance of Provident Fund accounts of more than 2.3 lakh Defence Civilians, through Project ‘NIDHI’.

SA to RM acknowledged that IFAs associated with DRDO have been working in a constructive manner as a cohesive team and helped in ensuring full utilisation of the funds allotted in an optimal manner. He underlined that it is essential for DAD officials to keep upgrading their profession skills and their competency through sustained training efforts.

FA (DS) said that as delegated financial powers are to be exercised in consultation or concurrence of integrated financial advisors, a great onus for optimum utilisation of budget lies on the officers of the Defence Accounts Department, who are acting as IFAs to various formation commanders. The department will, therefore, have to improve the availability of officers in the IFA stream and also build their competencies through greater training efforts and exposure to best practices. The department should explore the feasibility of delivering many services such as pay accounts of PBORs and pension disbursements through Central Processing Centers and implementing a modern payment and accounting system using new advancements in ICT fields.

The Chief Guest also commended the dedication and professionalism of DAD personnel in providing prudent financial advice and adding in the management of the Defence Budget. The vote of thanks was proposed by Shri N R Dash, Addl CGDA.

DAD DAY CELEBRATIONS: A WORD PORTRAIT

The awards ceremony was followed by a comedy play titled "Plaza Suite" and was performed by Dramatech Society, New Delhi. It depicted the last moment jitters of a soon-to-be bride and the agony experienced by her parents on this behaviour. The play was followed by a musical soiree which began with an invocation to Lord Ganesha by Shri Abhilit Halbe, Sr Auditor from PCDA (SC), Pune. The dance troupe from PCDA (SC), Pune comprising Ms Bijaya Dutta, Ms Vrushali Bhirud, Ms

Kavita Satturwar, Shri Vinod Kumar, Ms Swapnil Gedam, Ms Kamini Tiwari, Shri Amit Kumar-1, Shri Sanjay Bhuttapalle and Shri Amit Kumar-2 performed to the song of renowned artiste and Dada Saheb Phalke Award winner Dr Bhupen Hazarika's "Ganga Bahti Ho Kyun". Well-acclaimed singer Ms. Abhilasha Chellam, ward of Ms. Vijaya who is a DAD employee at PCDA (Navy), Mumbai enthralled the audience with popular bollywood numbers "Piya tose naina laage re", "Pal Pal .. Kaise katega", "Toota sa hai ik taara" and delivered a

stirring rendition of "Vande Matram". Shri Vinay Saxena, AAO from PCDA (P), Allahabad sang "Jahan Dal Dal pe sone ki chidiya" and "Laaga Chunri Mein D a g ". Ms. Remyaluxmi R, AAO from office of AAO (Navy), Kochi delivered a soulful violin rendition of bollywood number "Suraj Hua Madham". Shri Bansi Tiwari, Senior Auditor from AAO (Navy), Karwar sang Mukesh numbers "Ek din bik Jaayegaa" and "Kisi Ki muskuraahon".

The Raksha Mantri Awards Ceremony was compered by Ms. Richa Misra, Director NADFM whereas the cultural fiesta was compered by Shri Mihir Kumar, Director, Department of Financial Services, Ministry of Finance.

A health check-up camp by INMAS too was organized on the CGDA premises. DAD Offices across the country marked the day with various events like Blood donation camps, eye check-up camps, cultural programmes, tree plantation and sporting events.

LECTURES

*Lt. Gen K Surendranath, AVSM**, SM, VSM delivering a talk at NADFM*

A series of lectures was organized at NADFM, Pune for IDAS probationers. Major General (Retd) S K Yadav spoke to the probationers about military ethos, leadership and discipline. He described the role played by the armed forces in nation- building i.e. assisting the civil administration during natural calamities and welfare activities in border areas besides highlighting the sacrifices made in maintaining the territorial integrity of our country. The probationers also underwent training on manners and etiquettes in professional life in general and for IDAS officers in particular considering the fact that as part of their jobs they would be interacting with Armed Forces officers. Lt. General K Surendranath, AVSM**, SM, VSM too delivered a talk on 'The Emerging Security Challenges and the Internal Security situation of India'.

Shri B. G. Joshi, Retd. FA (DS) shared his experiences and anecdotes with officers and staff at the Office of the CGDA.

A single point system for recording and monitoring course related activities has been devised at RTC, Bengaluru. Developed in Visual Foxpro 6.0 it supercedes the initial Java based system. All activities pertaining to the courses being conducted are recorded in this system

DEFENCE PENSION ADALATS

Ms. Vandana Srivastava, CGDA, Dr. G. D. Pungle, PCDA (P) Allahabad and Shri Rajesh Sharma, CDA, Chennai at Defence Pension Adalat in Madurai, Tamil Nadu

CGDA interacting with a pensioner at Madurai

The 123rd Defence Pension Adalat was organized by CDA, Chennai at Madurai from 11th to 12th August, 2014. The Adalat was inaugurated by CGDA Ms. Vandana Srivastava. Lt. General Jagbir Singh, SM, VSM, GOC, HQrs ATNK&K area Chennai, Dr G D Pungle, PCDA (P), Allahabad and senior officers from Armed Forces, public sector banks and state government also graced the occasion. The adalat received 1306 applications and 438 applications were settled prior to the commencement of the adalat. 101 pensioners benefited financially and a total of ₹ 1.40 crores were disbursed. The highest individual beneficiary was Smt Rukmini Rajan who received an amount of ₹ 22.07 lakhs. ₹ 50,000/- was also disbursed as financial assistance by Army HQrs to some indigent ex-servicemen.

The 124th Defence Pension Adalat was conducted by CDA (PD), Meerut at Bilaspur (Himachal Pradesh) from 18th to 19th September, 2014. The Adalat was inaugurated by Shri A N Saxena, Addl CGDA. A total of 161 cases were registered before the inauguration of the adalat. 129 pensioners visited the adalat on 18th September whereas 103 pensioners attended the adalat on 19th September. Five benches consisting of pension expertise officers from Army, Navy, Air Force, PCDA (P), Allahabad, CGDA, bank representatives and CDA (PD), Meerut were set up for redressal of grievances. One separate bench was set up for "SUVIGYA" software so as to enable the pensioners to know their entitlement right from the date of their retirement. Three pension cheques were presented to the pensioners whose cases were settled on the spot.

Shri A. N. Saxena, Addl. CGDA making payments to a defence pensioner at Defence Pension Adalat, Bilaspur (HP)

INDEPENDENCE DAY CELEBRATIONS

GREEN INITIATIVES

GALACTIC ADDRESS OF EARTH

M. Anjaneyulu, IDAS
PCA (Fys) kolkata

History and Exploration

Humanity, for thousands of years did not recognize the existence of the solar system. People believed the Earth to be stationary; at the centre of the universe and categorically different from the divine/ethereal objects that moved through the sky. Although the Greek philosopher Aristarchus (250 B.C.) had speculated the heliocentric system but it was, Nicolaus Copernicus (1473 A.D.) who developed a mathematically predictive heliocentric system. During 17th-century, his successors-Galileo, Kepler and Newton, presented an understanding of the physical world that led to a gradual acceptance of the idea that the Earth moves around the Sun.

Structure and Composition of Solar System

The solar system consists of a star called the Sun and all other objects move around it. The solar system includes eight major planets, few minor planets (viz. Pluto etc.) along with their satellites (moons); asteroids; meteoroids; comets; interplanetary dust and electrically charged gas known as plasma. The solar wind, a flow of plasma from the Sun, creates a bubble in the interstellar medium known as the heliosphere. Shaped like a disc, the solar system is only a tiny part of our

galaxy called the Milky Way, that contains approximately 200 billion stars. The solar system is located within one of the outer arms of the Milky Way.

The Sun - a G2 main-sequence star is the principal component of the solar system that contains 99.86% of the system's known mass and dominates it gravitationally. The Sun's four largest orbiting bodies, the gas giants, account for 99% of the remaining mass. The overall structure of the solar system consists of the Sun, four relatively small inner planets surrounded by a belt of rocky asteroids, and four gas giants surrounded by the Kuiper belt of icy objects. Astronomers sometimes informally divide this structure into two separate regions. The inner solar system includes the four terrestrial planets and the asteroid belt. The outer solar system is beyond the asteroids, including the four gas giants. Some models of solar system have been framed on Earth, to convey the relative scales involved in the solar system on human terms. The largest such scale-model is at Sweden which is depicted below:

Planets of the solar system to scale. Jupiter and Saturn (top row), Uranus and Neptune (top middle), Earth and Venus (bottom middle), Mars and Mercury at last.

Formation and Evolution: The solar

system was formed 4.6 billion years ago from the gravitational collapse of a region within a large molecular cloud. As is typical of molecular clouds, this one consisted mostly of hydrogen, with some helium, and small amounts of heavier elements. As the region that would become the solar system, known as the pre-solar nebula, collapsed, conservation of angular momentum caused it to rotate faster. The centre, where most of the mass collected, began to flatten into a protoplanetary disc with a diameter of roughly 200 AU and a hot, dense protostar at the centre. The planets formed by accretion from this disc, in which dust and gas gravitationally attracted each other, coalescing to form ever larger bodies. Hundreds of protoplanets may have existed in the early solar system, but they either merged or destroyed, leaving the planets, dwarf planets, and leftover minor bodies, as we see today.

The solar system will remain, roughly as we know it today, until the hydrogen in the core of the Sun has been entirely converted to helium. That will mark the end of the Sun's main-sequence life. At that time, the core of the Sun will collapse, and the energy output will be much greater than at present. The outer layers of the Sun will expand to roughly 260 times its current diameter, and the Sun will become a red giant. The expanding Sun will vaporize Mercury/Venus and render the Earth uninhabitable as the habitable zone moves out to the orbit of Mars. Eventually, the core will be hot enough for helium fusion. After that it will eject its outer layers in the form of planetary nebula, returning some of the material that formed the Sun, to the interstellar medium, then become a white dwarf which fades

away over a period of time, marking the death of the Sun.

The Sun: The Sun is the solar system's star and its chief component. Its large mass produces temperatures and densities in its core high enough to sustain nuclear fusion, which releases enormous amounts of energy, mostly radiated into space as electromagnetic radiation and some in the form of visible light. The Sun is a G2 type main-sequence star when compared to other stars in the Milky Way, it is rather bright. Evidence suggests that the Sun's position in the main sequence puts it in the "prime of life" for a star, not yet having exhausted its store of hydrogen for nuclear fusion.

Disc of Sun with typical sun spots

Sun is aptly described by our ancient Vedic savants/sages and worshiped profusely. The Gayatri Mantra (3.62.10) of Rig Veda by the sage Vishwamitra gives the importance of Sun:

It means; Om, let our intelligence dwell on the beloved light of that creative God head, the Sun, who is the creator, so that he may endeavor us with right intelligence. This prayer protects those who recite it. With the savior name (Sun) the Supreme most luminous not only what we see but what we are to be, life must have been

an endless progression. The essence of this hymn is to worship the nature God—Sun, who is considered as prime force for the existence of this world; who protects us on this Earth. It means without Sun, there is no existence of life.

Interplanetary medium: The vast majority of the volume of the Solar System consists of a near-vacuum known as the interplanetary medium. Along with light, the Sun radiates a continuous stream of charged particles (plasma) known as the solar wind. This stream of particles spreads outwards, creating a tenuous atmosphere i.e., the heliosphere, that permeates the interplanetary medium. Activity on the Sun's surface, such as solar flares, coronal mass ejections, disturb the heliosphere, creating space weather and geomagnetic storms. The largest structure within the heliosphere is the heliospheric current sheet, a spiral structure created by the actions of the Sun's rotating magnetic field on the interplanetary medium. Earth's magnetic field stops its atmosphere from being stripped away by the solar wind. The heliosphere and planetary magnetic fields partially shield the solar system from high energy interstellar particles called cosmic rays.

Inner Solar System: The inner solar system is the traditional name for the region comprising the terrestrial

The inner planets. From left to right: Earth, Mars, Venus, and Mercury (sizes to scale)

planets and asteroids. The objects of the inner Solar System are relatively

close to the Sun composed mainly of silicates and metals.

The four inner/terrestrial planets have dense, rocky compositions, few or no moons, and no ring systems. They are composed largely of refractory minerals, such as the silicates, which form their crusts/mantles; metals such as iron and nickel in their cores. Three of the four inner planets (Venus, Earth and Mars) have atmospheres substantial enough to generate weather; all have craters, tectonic surface features such as rift valleys and volcanoes. The term inner planet should not be confused with inferior planet, which designates those planets that are closer to the Sun than Earth i.e. Mercury and Venus.

Asteroid Belt: Asteroids are small solar system bodies composed mainly of refractory rock and metallic minerals, with some ice. The asteroid belt occupies the orbit between Mars and Jupiter. It is thought to be remnants from the solar system's formation that failed to coalesce because of the gravitational interference of Jupiter. The asteroid belt contains tens of thousands of objects over one kilometer in diameter.

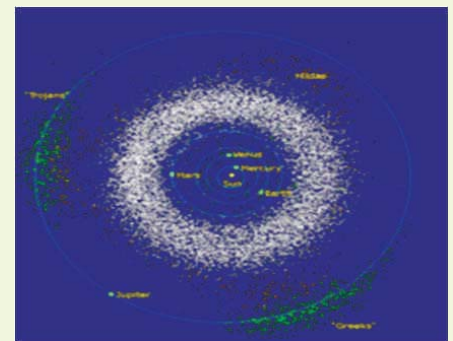

Image of the asteroid belt (white), the Jupiter trojans (green), the Hildas (orange), and near-Earth asteroids

Outer Solar System/Outer Planets: The outer region of the solar system is home to the gas giants and their large moons. Many short-period comets, orbit in this region. Due to their greater distance from the Sun, the

solid objects in the outer solar system contain a higher proportion of volatiles, such as water, ammonia and methane, than the rocky planets of the inner solar system. Due to the colder temperatures, these compounds remain as solids.

From top to bottom: Neptune, Uranus, Saturn, and Jupiter (with approximate colour and size)

The four outer planets, or gas giants (sometimes called Jovian planets), collectively make up 99% of the mass known to orbit the Sun. Jupiter and Saturn are each many times bigger in the mass than that of Earth and consist overwhelmingly of hydrogen and helium; Uranus and Neptune are far less massive and possess more ices in their makeup, known as "ice giants". All four gas giants have rings, although only Saturn's ring system is easily observed from Earth. The term superior planet designates planets outside Earth's orbit.

Trans-Neptunian region: The area beyond Neptune (the "trans-Neptunian region") is still largely unexplored. It appears to consist overwhelmingly of small worlds, composed mainly of rock and ice.

Kuiper belt: The Kuiper belt is a great ring of debris similar to the asteroid belt, but consisting mainly of objects composed primarily of ice. It extends between 30 and 50 AU from the Sun. Though it is estimated to contain thousands of dwarf planets and small solar system bodies. The dwarf planet Pluto (39 AU average) is the largest known object in the Kuiper belt, discovered in 1930, was considered earlier to be the ninth planet.

Scattered disc: The scattered disc, which overlaps the Kuiper belt but extends much further outwards, is thought to be the source of short-period comets. Scattered disc objects are believed to have been ejected into erratic orbits by the gravitational influence of Neptune. Most scattered disc objects (SDOs) have perihelia within the Kuiper belt but aphelia far beyond it.

Oort cloud: The Oort cloud is a hypothetical spherical cloud of up to a trillion icy objects that is believed to be the source for all long-period comets and to surround the solar system at roughly 50,000 AU (around 1 light-year), and possibly to as far as 100,000 AU (1.87 light year).

Boundaries: Much of the solar system is still unknown. The Sun's gravitational field is estimated to dominate the gravitational forces of surrounding stars out to about two light years. Despite discoveries such as Sedna (minor planets), the region between the Kuiper belt and the Oort cloud, an area tens of thousands of AU in radius, is still virtually unmapped.

Farthest regions: Heliosphere and Heliopause:

The point at which the solar system ends and interstellar space begins is not precisely defined because its outer boundaries are shaped by two separate forces: one the solar wind and the other is Sun's gravity. The outer limit of the solar wind's influence is roughly four times Pluto's distance from the Sun i.e. the heliopause and is considered the beginning of the interstellar medium. The Sun's heliosphere is the effective range of its gravitational dominance, in the form of a sphere. This is the point at which the solar wind finally terminates. The shape and form of the outer edge of the heliosphere is likely affected by the fluid dynamics of interactions with the interstellar medium as well as

solar magnetic fields prevailing.

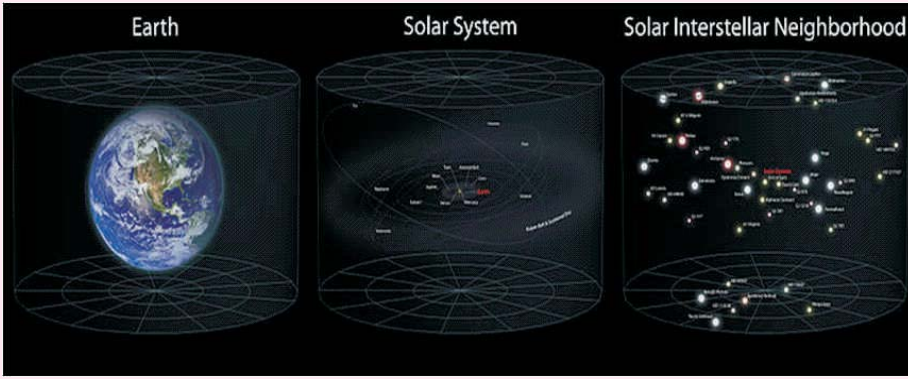

Galactic context: The solar system is located in the Milky Way. The Sun resides in one of the Milky Way's outer spiral arms, known as the Orion–Cygnus Arm or Local Spur. The Sun lies between 25,000 and 28,000 light years from the Galactic Centre, and its speed within the galaxy is about 220 kilometres per second, so that it completes one revolution every 225–250 million years. This revolution

Position of the Solar System within the Milky Way

is known as the solar system's galactic year. The solar system's location in the galaxy is a factor in the evolution of life on Earth. Its orbit is close to circular, and orbits roughly the same speed as that of the spiral arms. Therefore, the Sun passes through arms rarely and this has given Earth long periods of stability for life to evolve. The solar system also lies well outside the star-crowded environment of the galactic centre. This also helps life to evolve on Earth without catastrophic implications from galactic center.

Neighbourhood: The solar system is currently located in the Local Interstellar Cloud or Local Spur/Fluff. The Local Interstellar Cloud is an area of denser cloud in an otherwise sparse region known as the Local Bubble, an hourglass-shaped cavity in the interstellar medium roughly 300 light years across. The bubble is suffused with high temperature plasma that suggests it is the product of several recent supernovae. There are relatively

few stars within ten light years of the Sun. The closest is the triple star system Alpha Centauri, which is about 4.4 light years away. Alpha Centauri A and B are a closely tied pair of Sun-like stars, whereas the small red dwarf Alpha Centauri C also known as Proxima Centauri, orbits the pair at a distance of 0.2 light years. The closest known extrasolar planet to the Sun lies around Alpha Centauri B. Its one confirmed extrasolar planet, at least 1.1 times bigger than the Earth's mass and orbits its star every 3.2 days.

Conclusion: The following sukta of

Isavasya Upanishad describes the universe aptly which purports the current scientific thinking on universe.

ॐ ईशावास्यमिदं सर्वं यत्किञ्चजगत्यांजगत् ।
Om isavasyam-idamsarvamyat-
kincajagatyamjagat,

तेन त्यक्तेन भुञ्जीथामागृधः कस्य स्विद्धनम् ॥
Tenatyaktenabhunjithama
grdhahkasyasveddhanam (1)

All this, whatsoever moves in this universe, including the universe, itself moving, is indwelt or pervaded or enveloped or clothed by the Lord. That renounced, thou shouldst enjoy.

ये है मेरा हिंदुस्तान

'Kfdj vnly fl fīdh

(व. ले. प.), र. ले. प्र. नि. (अनु. एवं वि.),
नई दिल्ली

ये है मेरा हिंदुस्तान, मेरे सपनों का जहान,
इससे प्यार मुझे!

हंसता—गाता जीवन इसका धूम मचाते मौसम,
गंगा—जमुना की लहरों में सात सुरों की सरगम,
ताज के नूराधर से सुंदर तस्वीरों के मंजर।

ये है मेरा हिंदुस्तान, मेरे सपनों का जहान,
इससे प्यार मुझे!

दिन अलबेले, रातों इसकी मस्ती की सौदागर,
धरती जैसे लूट रही हो दूध की कच्ची गागर,
ऊँचे—ऊँचे पर्वत इसके, नीले—नीले सागर।

ये है मेरा हिंदुस्तान, मेरे सपनों का जहान,
इससे प्यार मुझे!

बादल झूमे, बरखा बरसे, पवन झकोले खाए,
धरती के फैले आगन में यूँ खेती लहराए,
जैसे बच्चा माँ की गोद में रह—रह के मुस्काए।

ये है मेरा हिंदुस्तान, मेरे सपनों का जहान,
इससे प्यार मुझे!

राधा, सीता, चंद्र गाये, गाये इंदुबाल,
नैनों में काजल के डोरे, सुर्ख गुलाबी गाल,
जुल्फों की वो छाया जैसे शिमला—नैनीताल।

ये है मेरा हिंदुस्तान, मेरे सपनों का जहान,
इससे प्यार मुझे!

राजा—रानी, गुड्डा—गुड्डी और परियों की कहानी,
बच्चों की संगत में सुनाए बैठ के बूढ़ी नानी,
लोरी गाए, माथा चूमे, ममता की दीवानी।

ये है मेरा हिंदुस्तान, मेरे सपनों का जहान,
इससे प्यार मुझे!

रक्षा लेखा विभाग

प्रशासन, आईए, आर, हिंदी कक्ष, ईडीपी

नियंत्रक कार्यालय विभाग की आत्मा,

सब के कार्य से गरिमा औ' महिमा।

रक्षा लेखा के सर पर सदा ही ताज रहे,

हर लब औ' दिल पे सदा इसका राज रहे।

बापू

idat nyky

कनिष्ठ हिन्दी अनुवादक, र. ले. म. नि. दिल्ली कैंट

जाने क्यों बापू हर रोज तुम्हें महसूस करता हूँ
तुम्हारे आदर्शों को लेकर सरे-राह ज़िद करता हूँ
सोचता हूँ तुम होते तो आज एफडीआई को लेकर क्या कहते
क्या तुम दोबारा गुजरात में ही पैदा होना चाहते....
क्या तुम नरोडा में जाकर उपवास करने लगते....

लेकिन बापू तुमको वो बताते हैं मजबूरी का नाम
क्या मजबूरी थी तुम्हारी जो बुझाने चले गए थे नोआखली की आग
जब सारा देश आज़ादी का जश्न मना रहा था
तू नंगा फकीर दंगों की आग बुझा रहा था
तुम मजबूर ही रहे होगे, अपने चरित्र से, अपने आदर्शों से
वरना क्यों जीवनभर लिपटे रहते अपनी आस्था की चादर से
और आस्था भी ऐसी जो एक क्षण भी डगमगाई नहीं
सत्य और अहिंसा की वो लौ पलभर भी थरथराई नहीं....

मैं ईश्वर को नहीं मानता लेकिन तुम्हारी आस्था के करिश्मे को मानता हूँ
बापू शायद तुम्हारे राम कोई और ही थे,
वो कहानियों वाले राम तो नहीं थे...
कहानी वाले राम से बापू बड़ा डर लगता है
पहले सारे देश के बस तुम एक ही बापू थे
आज तमाम शहर बापूओं से भरे पड़े हैं
जो निर्भया की अस्मिता की रक्षा का मंत्र जानते हैं
और हमारी अंधी-आस्था से उपजा यह व्यापार-तंत्र जानते हैं....

बापू तुम्हारी बहुत याद आती है, जब इंसानियत को मजहब में बंटता
देखता हूँ

तुम होते तो शायद भागलपुर, गोधरा और मुजफ्फरनगर न होते
कोई निर्भया सिसकियाँ भरते-भरते दम न तोड़ती
किसी किसान की ज़िन्दगी उससे यूँ मुंह न मोड़ती

बापू अब लोग टोपियों पर तुम्हारा नाम लिख उसे उछालते हैं
हिंसा और अलगाव को अपना धर्म मानते हैं
और अहिंसा... अहिंसा बस एक टूटा हुआ सपना बनकर रह गई है
जिसे हमारी सरकारों ने डाक टिकटों में हिफाजत से सहेज दिया है

एक वामपंथी के नाते मेरी अक्सर तुमसे मुठभेड़ होती है
और मैं चाहता हूँ कि झूठ बोल दूँ पर हर बार तुम ही जीतते हो
तुम सही कहा करते थे कि सौ में से नित्यानवे रास्ते अहिंसा के हैं,
एक आखिरी रास्ता हिंसा का है... लेकिन वो आखिरी है...
और दुनिया के नित्यानवे मसले पहले नित्यानवे रास्तों से हल हो सकते हैं

बापू तुम मर नहीं सकते, कभी नहीं
जब-जब रात को करवटें बदलते नींद नहीं आएगी,
तब-तब हम तुम्हें अपने सिराहने ही पाएंगे
और ये मैं ही नहीं मानता, भगत सिंह भी मानते थे.. लेनिन भी.. और
बाकी सब भी..

अविरल गंगा

निहार रंजन, स. ले. अ.

लेखा व बजट अनुभाग, र. ले. म. नि., दिल्ली कैंट

शिव शीश से निकल के गंगा,
हुई अवतरित इस धरा पर,
भागीरथ के दुरुह प्रयास से,
अमृतमयी प्रवाहमयी हुई।

कहीं गिरि तो, कहीं गहवर में,
कहीं पठार तो, कहीं समतल में,
कहीं शांत, स्निग्ध तो कहीं है गर्जन, नर्तन,
कहीं है निश्छल, शीतल और कहीं है वेग, तरंग।

मोक्षदायिनी, पतितपावनी, जीवनदायिनी,
त्राणदायिनी, योगक्षेमकारी, त्रिपथगामिनी,
अलकनंदा, भागीरथी, तू ही मंदाकिनी,
त्रिधारा, जटाशंकरि, तू ही अमरतटिनी।

तेरी अविरल धार से असंख्य जीव सुख पाते,
तेरी निर्मल प्रवाह से असंख्य पाप धुल जाते,
स्पर्शमात्र से जिसके तन, मन पवित्र हो जाता,
स्मरण मात्र से ही अपूर्व आनंद छा जाता।

कोटि-कोटि जन की जीवन रेखा तू,
कोटि-कोटि मन की श्रद्धा तू,
कोटि-कोटि जीव जन्म तुझ ही से पाते हैं,
कोटि-कोटि जीवन लौट तुझ ही में जाते हैं।

विकास के इस प्रवाह में धार तेरी कुंद हुई,
अपनी ही संतति के कर्म से अविरल गंगा मंद हुई,
माता के आँचल को संतान का कलुषित उपहार मिला,
प्रगति के इस विहान में गंगे को अंधकार का अभिशाप मिला।

श्रद्धा सोयी, विश्वास खोया आस्था को विराम मिला,
जननी, संतति के इस रिश्ते को आज नया व्यायाम मिला,
अधिकार के इस युग में कर्तव्य को विश्राम मिला,
चकाचौंध की इस दुनिया में गंगा को दुःखधाम मिला।

सुख पाने की होड़ बड़ी है, गंगा पर विकट भार पड़ी है,
इच्छाओं की सूची बड़ी है, गंगे को बस कूड़ा-कचरा मिली है,
शिक्षा का संचार हुआ, बुद्धि का विस्तार हुआ,
पर 'हम' से इतर 'मैं' का ही फैलाव हुआ।

गंगा जीवन का सच है, विकास का पथ है,
गंगा कर्म का प्रकाश है, प्रगति का विश्वास है,
गंगा की अविरल धारा अवरुद्ध ना होने पाये,
स्वच्छता का ले संकल्प ताकि बहती रहे गंगा चरैवेति...चरैवेति...

Swachh Bharat Abhiyan (Campaign Clean India)

"Swachh Bharat Abhiyan" is a national level campaign by Government of India covering 4041 Statutory towns to clean the streets, roads and infrastructure of the country.

The campaign was formally launched on 2nd October, 2014 at Rajghat, New Delhi where our Prime Minister Shri Narendra Modi led the nation by wielding the broom and cleaning roads and pavements. The campaign is India's biggest ever cleanliness drive and 3 million Government employees and schools/college students participated in this event.

It aims to accomplish the vision of 'Clean India' by 2nd October, 2019, the 150th birth anniversary of the "Father of the Nation" Mahatma Gandhi and is expected to cost over ₹ 62000 crore. The campaign was described as 'beyond politics' and 'inspired patriotism'.

Various cleanliness programmes were undertaken in all DAD offices across the nation. The CGDA initiated the campaign by participating in the cleanliness drive at DPDO Brar Square, Delhi Cantt and followed it with a drive at the Office of the

सत्रह लाख पेंशनरों को संशोधित पीपीओ जारी

सीजीडी ने दी बधाई, सीडीए पेंशन में नए दफ्तर परिसर का उद्घाटन

सीडीए पेंशन कार्यालय में रक्षालेखा महानियंत्रक वंदना श्रीवास्तव ने नए दफ्तर का उद्घाटन किया।

इलाहाबाद (ब्यूरो)। कार्यालय रक्षा लेखा प्रधान नियंत्रक (पेंशन) द्रौपदी घाट इलाहाबाद ने वर्ष 2006 से पहले सेवानिवृत्त हुए डिफेंस के 16 लाख 70 हजार से अधिक पेंशनरों को संशोधित पेंशन भुगतान आदेश (पीपीओ) जारी कर दिए हैं। शुक्रवार को इलाहाबाद आई रक्षा लेखा महानियंत्रक (सीजीडीए) वंदना श्रीवास्तव ने सभी अफसरों एवं कर्मचारियों को बधाई दी। साथ ही कार्यालय में नए दफ्तर परिसर का उद्घाटन किया।

उन्होंने प्रोजेक्ट संगम से जुड़े सभी अफसरों एवं कर्मचारियों को बधाई देते हुए कहा कि अल्प समय में 16 लाख 70 हजार से अधिक पेंशनरों को संशोधित पीपीओ जारी किए जाने का काम बड़ी उपलब्धि है। लंबे समय से रक्षा सेवा से संबंधित पेंशनभोगी इसकी मांग कर रहे थे। इस कार्य के पूरा हो जाने से पेंशन भुगतान करने वाले कार्यालयों को सही पेंशन राशि का भुगतान करने में मदद मिलेगी। कार्यालय में 10 करोड़ की लागत से 7513 वर्गमीटर क्षेत्रफल में बने नए दफ्तर परिसर का उद्घाटन करते हुए उन्होंने परिसर में वर्षा जल संचयन एवं आधुनिक

अग्निशमन यंत्र की व्यवस्था किए जाने की तारीफ की। महानियंत्रक ने विश्वास जताया कि नव निर्मित भवन निश्चित तौर पर विभिन्न अनुभागों की कार्य पद्धति को बेहतर बनाएगा और कार्यालय के ज्यादातर दस्तावेजों, पीपीओ वाइंडर आदि को वहां समुचित स्थान मिलेगा। उद्घाटन समारोह में एयर मार्शल केएस गिल एओसीइन्सी सेंट्रल एयर कमांड और मेजर जनरल तरनजीत सिंह जीओसी 4 इंफैंटी डिवीजन विशिष्ट अतिथि के रूप में मौजूद रहे। इससे पहले रक्षा लेखा प्रधान नियंत्रक (पेंशन) इलाहाबाद डॉ. जीडी पुंगले ने अतिथियों का स्वागत किया।

Foundation laid

STAFF REPORTER

GUWAHATI, Aug 27 – The foundation stone of the Additional Defence Accounts Department (DAD) residential complex of the Controller of Defence Accounts (CDA) office of Guwahati was laid today by Kumari Vandana Srivastava, Controller General of Defence Accounts at a function, said an official press release, adding that the function was attended by Pramod Kumar Das, CDA Guwahati, AN Das, Joint CGDA, Brig PS Jaiswal, Chief Engineer, Shillong and other officers and staff members of Military Engineering Service and Defence Accounts Department.

पखवाड़ा का समापन

कार्यालय के कमियों को संबोधित करते हुए नियंत्रक राकेश कुमार।

पटना। रक्षा लेखा नियंत्रक कार्यालय में हिंदी पखवाड़े का समापन हुआ। पखवाड़े के दौरान निबंध, टिप्पणी, श्रुतिलेख प्रतियोगिता का आयोजन किया गया। इस अवसर पर रक्षा लेखा नियंत्रक राकेश कुमार ने कहा कि पिछले एक वर्ष के दौरान हिंदी को गति देने के लिए महत्वपूर्ण निर्णय लिया गया है। उन्होंने कहा कि अब कार्यालय में ज्यादातर काम हिंदी में होगा। सूचना प्रौद्योगिकी के क्षेत्र में हिंदी को अधिक से अधिक बेहतर करने की आवश्यकता है। कार्यक्रम में भारत लेखा नियंत्रक कार्यालय पटना के सहायक नियंत्रक एसएन पांडेय और डॉ. सुलक्ष्मी कुमारी उपस्थित थे।

20 more residential quarters for defence officials in Shillong

Guwahati: The Controller General of Defence Accounts, Kumari Vandana Srivastava, on Thursday laid the foundation for the proposed 20 additional residential accommodations for Defence Accounts Department (DAD) officers and staff in Shillong.

Srivastava was present at the bhoomi pooja. Several senior officers of the Defence Accounts Department, the Army and Air Force attended the event. The DAD handles the accounts, internal audit of the armed forces and other organizations under the ministry of defence and also provide them financial advices. Shillong is an important base for DAD. With staff members and officers stationed here from all over the country, there aren't enough quarters for them and the present accommodation comprises four Type IV quarters and 16 Type III quarters in the DAD Residential Complex, Shillong. The ministry of defence (Finance) has accorded sanctions for the construction of 20 additional residential accommodation including one Type-V, four Type-IV and 15 Type-III quarters for DAD officers and staff at Shillong at an estimated cost of Rs 695.07 lakh. On Wednesday, Srivastava laid the foundation for DAD residential complex at Narangi in Guwahati.
