Subject: Implementation of NEW COMPILATION SYSTEM

As you are aware that a new online compilation system, which runs on the CGDA WAN, has been developed in the HQ Office and the present foxpro based system will be discontinued from next financial year. All the CDAs are utilizing this system and uploading data into this system for the last 6 months.

The practice of sending data on e-mail will no more be needed in the new system. However it will continue in the current financial year. Underlying principle behind the system is to reduce time lag between uploading of data and generation of reports. To achieve the above goal, frequency of the data to be uploaded has been kept on daily basis. Efforts are on to make it real time at least for all the offices having OA system. You are requested to discontinue the FoxPro dbf files through e-mail for the FY 2014-15 i.e after April 1, 2014. All general reports have been included in the system. However, if more reports are required they may be intimated to HQrs for incorporation.

You are requested to examine the reports generated through the new compilation system and provide a feedback to HQrs on the same. Responsibility of the correctness of the uploaded data will lie with the concerned offices. The system generates reports instantaneously as soon as the data is uploaded in the system, therefore, editing and deletion may not be allowed at a later date as it will affect the sanctity of the data.

You are required to monitor the timely uploading of data and viewing of reports and reporting to HQrs for any discrepancies during the parallel run for smooth transition to new system next financial year.
